

My family and I listen to K-LOVE radio on FM 88.3 and 91.1. K-LOVE is a continual source of music, news and encouragement in our household. Many of our friends and co-workers also enjoy the commercial-free aspect of K-LOVE. The station keeps us abreast of local & national events of interest to us. We are encouraged morning, noon and night by their programming and would not want to see it replaced by LPFM stations that would not provide us with the same balance of local, regional and national programming.

We request that the FCC not modify its rules to give priority to LPFM stations that might replace K-LOVE.
